Reference letter

I am pleased to provide this letter of reference for Jarosław Kubiak, who has been an invaluable partner in the development and continuous improvement of our custom ERP system over the past ten years. As a company operating in the window joinery industry, we required a comprehensive, tailored solution to streamline our operations, enhance efficiency, and support our business growth. Jarek delivered beyond our expectations.

From the initial stages, Jarek designed and implemented a scalable ERP system in PHP and MySQL that transformed the way we manage our business processes. The system evolved to an advanced platform that now handles:

- Warehouse and supplier order management
- Customer offer management and email communication
- Order tracking and invoicing with PDF generation
- Production tracking, including employee task registration
- Transport management for finished products
- Automated reporting and analytics for informed decision-making
- Customer and driver portals for real-time order status updates

Jarek demonstrated exceptional problem-solving skills, deep technical expertise, and a keen understanding of our business needs. His ability to automate workflows, reduce manual workload, and improve data accuracy has significantly enhanced our operational efficiency.

Beyond technical capabilities, Jarek has been a reliable and professional collaborator, always delivering solutions on time and adapting to our evolving needs. His contributions have had a profound impact on our company's productivity and overall success.

I highly recommend Jarek for any role that requires expertise in software development, ERP solutions, and business process optimization. He would be a valuable asset to any organization seeking an experienced and dedicated professional.

Sincerely,

ARCUS
